EXPERIENCE

R&D Engineer - **Nethive**

📅 March 2022 - Present

📍 Padua, Italy

- Working on the backend side of microservice-based privacy solutions projects and event-driven applications.
- Deploying cloud-based applications with particular attention to the security of the latter.

High school intern - **Zucchetti**

📅 May 2017 - June 2017

📍 Padua, Italy

During this two-month internship, I have been beside different company departments such as Helpdesk, Marketing, and Soc. In particular, I mainly stayed in the Development department, working on implementing some features for the Intranet management software.

EDUCATION

M.Sc. in Software Dependability and Cyber Security - **Ca' Foscari University of Venice**

📅 2021 - in progress

📍 Venice, Italy

B.Sc. in Computer Science - **Ca' Foscari University of Venice**

📅 2018 - 2021

📍 Venice, Italy

- Thesis: "Implementation of a Netdisco-based microservice to search for hidden devices on a network".
- Grade: 100/110

SIDE PROJECTS

CPU Virtualizator - **C** **Bash**

🐙 CPU Virtualizator

C project that simulate CPU execution using smaller assembly-like instructions.

Connect4 - **MongoDB** **Express** **Angular** **Node.js** **Web Socket** **Docker**

🐙 Connect4

MEAN stack web application that allows you to play and spectate Connect 4 games with your friends and random players.

Contribution to LiSA static analyzer - **Java** **Gradle**

🐙 String graph domain LiSA

Contributed to LiSA static analyzer extending domain with String graphs.
